Hans Holmer, the Irish (?) Marathon runner who has made such an excellent showing in this country, will sail Saturday for England, where he will run several match races with the best runners of Europe. CHICAGO'S BIG AUTO MEET

Chicago, June 9.—For the first time since the running of the Glidden tour twenty-four hour race in 1908, Chicago is to have a big auto track race meet, which will take place tomorrow and Sunday. The Hawthorne course has been prepared for the event, the track having been scraped, rolled and oiled after the motorcycle events of last week. Chicago has made great preparations to witness a spectacular and sensational race.

Homer C. George, who managed the New Orleans Mardi Gras race meet, has personal direction of the big events.

NEW LINE FROM PACIFIC PORTS.

San Francisco, June 9.—The Java-Asiatic company has planned to inaugurate a new line to South American ports, beginning tomorrow. The first vessel to sail will be the British steamer Strathberg, which will leave here, touching at Puget Sound ports before steaming for Montevideo, Buenos Ayres and Rosario. She will be followed by other steamers in August and November. At present all Pacific freight to these ports must go east by way of Panama and thence south by Atlantic steamers, entailing a combination of almost prohibitive rates.

NOTICE TO WATER CONSUMERS.

Mr. T. J. Preston, manager of the waterworks, requests The Eagle to announce that on account of taking up the old water mains and putting in the new, the people in the northwest part of town will necessarily be deprived of water service for a few days.

WOMEN ARE LEARN- ING THE ROPES

Mrs. Albion Fellows Bacon Tells How to Get Measures Through the Legislature.

[By Associated Press.]
Boston, Mass., June 9.—That women are beginning to learn the ropes in getting laws through state legislatures was demonstrated before the section on "Housing, Health and Recreation" of the National Conference of Charities and Correction here this morning by Mrs. Albion Fellows Bacon, of Evansville, Ind., who has become known all over the country as the author of Indiana's housing law.

Mrs. Bacon said in part: "When the legislature opens and the 'Pibroch of Dhonn! Dhu knells for the onset,' when you see the blank look on some of the faces of the members when you approach them on housing, you are apt to think, 'Why didn't I get in more work on the members of the legislature themselves before it began? Why didn't I send these stories and pamphlets to them in their homes before they were bewildered and worn out and under the party lash? Too late then, to put your pictures and letters on their desks; all you can do is to use a gatling gun or a steam roller."

"In legislative campaigns it is advisable to study the methods of successful politicians. Get the prominent men of both parties on your side; especially the party in power. Get all the pledges you can before elections and afterwards. You will need influence with the legislature leaders and with the speaker of the house and the president of the senate, for you will have very little show if they are not with you. If there is a boss who can be converted to noble ends your work will be simple."

Mrs. Bacon outlined the campaign as carried out in Indiana to secure a law prohibiting the building of improper tenements in the larger towns and cities in the state and concluded that housing reform can never be won without hard work and practical methods.

"Two things are needed in every state," said Mrs. Bacon. "One is the faith of the prophet. In Indiana we count our success due to our prayers more than to our hard work. The other is the vision of the prophet—a vision of the filth and sin, the 'abomination of desolation' of our cities, and above that, a vision of the City of Shining Beauty where there is no sickness nor crime nor contagion, where the streets are clean and it is always light."

DOMINION ATHLETES TO SAIL.

In addition to the festival games, the Canadians will take part in the English Amateur Athletic Association championships to be held at Stamford Bridge on the first of next month.

CONJECTURES.

If it were only given to mortals to know what they are missing, there might be less complaint in the world. Even a drouth may be a blessing, for who knows but that the boll weevil and the locust may be waiting for dampness to eat up the country. Also, who knows to the contrary that the workings in the upper atmosphere and the blowing of dry winds is but a fortunate escape from destructiveness and storms, which have been "in the hollow of His hand?"—Temple Telegram.
